

PRESENTS

WESTERN BLOT BEST PRACTICES: INCREASED SENSITIVITY AND ROBUST REPRODUCIBILITY WITH THE ODYSSEY CLX

Apply now!

The Odyssey CLx Imaging System is a state-of-the-art 2-channel near-infrared (NIR) fluorescent imager designed for precision and versatility.

In this course you will learn how to produce consistently reproducible data across experiments and to use the intuitive acquisition and data analysis software.

Instructor: Lea Nästle and Antonio Peteira, LICORbio

Dates: 18th February 2025

Hour: 10h to 11.30h

Location: CRG

Target: Every user doing western blotting
